Suzanne, the IAG number is DW-14-95805001

Paula, can you provide the official name and Site number (if one exists)?

Thanks!

Thanks, Andrew. This is helpful. We will likely need some information from you such as:

Site name, site ID number, and IAG number.

Will forward this information to Rob and Earl.

Regards,

Suzanne

Hi Suzanne,

The terms and conditions of the IA state the following:

**Recipient** will provide monthly progress reports to the EPA Regional Project Officer containing the following information for each project or task worked on:

Site name, site ID number, and IAG number

Summary of work performed this period

Estimate of the percentage of project completed

Accounting of funds expended during the reporting period and on the project to date, which includes budget category cost breakdown (See Item 22, page 2)

Summaries of all problems or potential problems encountered during the reporting period

Projected work for the next reporting period.

I think if Rob filled out a progress report addressing each of the items above that would be great.

Thanks!

Hi Andrew,

I have inquiries in to Rob and Earl Cassidy. Did you receive an invoice or are you just checking in on the status? Are you the technical lead? Just trying to clarify whether we need a formal reporting process and if so, what it is.

Thanks and have a happy holiday season,

Suzanne

Hi Suzanne!

Thanks for getting back to me so quickly. Definitely let me know what Rob and/or his supervisor say. Hopefully I'll be sending some more work your way soon. ☺

If I don't talk to you again, have a great holiday!

Hi Andrew,

Good questions. I'll check in with Rob and his supervisor. If you received an invoice, it would have been from Rob charging toward the IA, because I don't think that we have any other work in progress for you. Let me know when you do need additional assistance, and I'll check in with Rob.

Thanks,

Suzanne

Hi Suzanne,

I wanted to check in regarding the status of Rob Runkel's modeling effort. Is he now billing towards our IA? Do you know the current status of the modeling?

Thank you!
